

# Energy Conservation

By: *The Green Apple Conservation Crew*

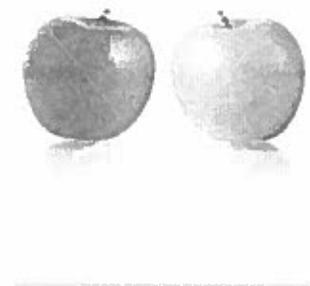

## Introduction

We are the Green Apple Conservation Crew from Armand Bayou Elementary and we are trying to help you find ways to save energy. We want you to save energy for school and help the planet.

## Contest

We are sponsoring a competition to reward students and teachers for conservation of energy. Green Apple Crew Members will randomly be checking classrooms throughout the day to see who is conserving energy. Each time a crew member catches you conserving energy you will get a green apple, but each time a crew member catches you wasting energy you will get a red apple. We will announce weekly which classrooms have earned the most green apples per week.

## How to earn apples

To earn green apples you save energy. You turn off lights when you are not using them. You can turn off the projector or electronics when not in use. Turn off anything that uses energy at the end of the day. To get a red apple the Green Apple Crew members will have to catch you wasting energy. Whenever you go out to recess you might have the lights on.

**If you have any questions please contact the following crew members.....**

Team Leaders: Mrs. Williams and Ms. Danek

5th: Alyssa S. and Natalie E.

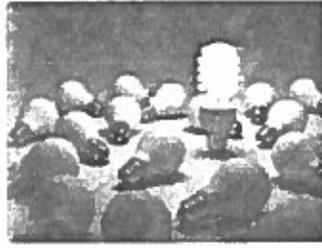

4th: Maddison M. Rifa M.

3rd: Mason S. Varun B.

2nd: Isabella L. and Chloe S.
